Kneat – Test Workings

Unit Test

1. What is the output when the starship has no stops to make?
2. What happens if the user inputs "abc123" as the distance?
3. What happens if the user inputs -1000 as the distance?

Integration Test

1. What happens if the program can't connect to the API?
2. What happens if the data in the API was not in correct format e.g. "200M", how will my program handle that?
